RE: MCI Telecommunications Corporation Lightwave Systems
Convention Center Relocation Project, Maintenance
Project No. 07778.

Dear Sir:

The City of Mobile was the sight of one of your maintenance projects in late 1990. The project was coordinated through the City Engineering Department. We were pleased with the way Mr. Fred Lefevre prepared for the project, and in the communications with other MCI personnel such as Mr. Scott Alexander and Mr. Steve Martin.

There have been other instances where there had been advance preparation for projects within the City of Mobile's jurisdiction which did not proceed as well as did MCI's project. This we feel was in large part due to the way that Mr. Mickey Redwine of Dynamic Cable Construction Inc. viewed his company's involvement in the project. Dynamic Cable met or exceeded all of the requirements set forth by the City of Mobile. Representatives of MCI and Dynamic Cable were in constant communication with the City Engineering Department whenever there was any question involving the proper way to proceed with their work. This resulted in an improvement to the area surrounding the project.

The manner in which this project was executed and managed was appreciated by the City Engineering Department.

Sincerely yours,

Robert A. Vogtner, P.E.
Assistant City Engineer
